

In-Vehicle Technologies

Product Brochure

Only Company in the world that provides both software and hardware for connecting people through on-demand transport

Overview

DDS Wireless is a world leader in demand response software and deployed mobile data terminals. We build solutions that allow drivers to use their own devices, and offer a sturdier device built for longevity and harsher conditions. We provide drivers with every option to fit their needs and successfully manage passenger requests.

We build solutions that allow drivers to use their own devices, and offer a sturdier device built for longevity and harsher conditions.

mSlate™

The mSlate is a ruggedized mobile data computer built to perform in the most demanding commercial fleet settings. Built by DDS Wireless, the mSlate blends powerful wireless technology and GPS vehicle tracking along with voice and data communications in a fully-integrated platform to boost vehicle monitoring and on-time performance.

Apps

We are committed to building applications that work with your hardware. The apps listed here work on the mSlate and on Android tablets.

Taxi-Driver Pro

This app allows drivers to accept jobs and manage their activities, and identify busy areas with heat maps and hot zones. Available on Android tablets or the mSlate ruggedized tablet.

Taxi- Driver Assistant

This app enables drivers to receive and accept trips while away from their vehicles without jeopardizing service standards or customer experience. Available on iOS or Android.

Transit - mBus & MBRV

This MobiRouter and MTC companion app is the driver's productivity tool. It enables drivers to manage shifts, breaks, trip acceptance and reporting, vehicle tracking and messaging to dispatch. Available on iOS, Android or the mSlate ruggedized tablet.

Taxi-Soft Meter

Soft Meter allows you to modernize the front of your vehicle, increase driver efficiency and reduce errors, all while providing precise time and distance measurement. It runs on the same device as Driver Pro.

Transit- ADEPT Explorer

This app provides your drivers with up-to-date trip manifests and turn-by-turn navigation for optimal productivity and safety. The driver can track arrival and perform events at each stop while maintaining continuous communication with dispatch. Available on Android or the mSlate ruggedized tablet.

Bring Your Own Device (BYOD)

In-vehicle technology is evolving so fast. At DDS, we are committed to helping you, the customer, adapt to these changes as they happen.

We understand that every company is different. Every company wants to bring their own devices to the party, with a focus on Android. We are building solutions that work with your hardware.

About DDS Wireless

DDS Wireless Inc. is number one in real-time scheduling and dispatch software. As the only fleet management solutions provider in the world that also provides hardware, we're the industry experts in on-demand people movement. DDS has years of experience in operating on a global scale. We are headquartered in Richmond, Canada and have regional offices in Seattle, Sweden, Finland and the UK. We also have sales, support and technical personnel employed across the globe in Canada, the U.S. and Europe.

- 32 Years of Transportation Leadership
- 400 Million Trips Performed Annually
- 225 Systems Deployed in 11 Countries Globally
- 90,000 Mobile Data Terminals Deployed

Ready to optimize your transportation organization?

400 million trips are booked and managed annually through DDS Solutions.
