

Introducing **ADEPT IQ**

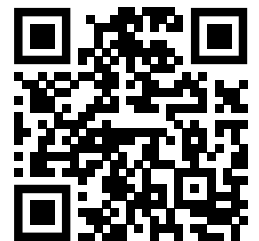

Intelligent Demand Response Transit

*Used by North America's largest Transit Authority
to dispatch over 30,000 rides everyday*

- **ADA Compliant ParaTransit Booking, Scheduling and Dispatch**
- **Continuous Route Optimization based on Real-time traffic and road conditions**
- **Automatic Vehicle Location and Monitoring**
- **Intuitive Driver, Supervisor and Passenger Apps**
- **Embedded Maps with Real-time Traffic and Incident Playback**
- **Highly available, reliable and secure Solution Hosted on the AWS Cloud**

StrataGen, A DDS Wireless Company, has been supporting municipalities, governments, and transportation agencies since 1997 to meet the requirements of the Americans with Disability Act (ADA) and other regulatory protocols. ADEPT™ has evolved to include full dispatch, scheduling, booking and reporting and enabled transit authorities to improve the passenger experience while lowering operational costs and efficiently managing door-to-door paratransit ridesharing services. ADEPT™ continuously incorporates and analyzes traffic and weather updates from various sources like DOT to identify street-level service disruptions and optimize vehicle routes in real-time. At the same time ADEPT™ takes advantage of existing city infrastructure to complement the on-demand paratransit services with extensive fixed-route and taxi systems.
